Descriptors- *Administration, *Delinquency, Demography, *Exceptional Child Research, Expenditure Per Student, Expenditures, Geographic Distribution, Geographic Regions, Institutional Administration, Institutional Facilities, Institutionalized (Persons), Institutional Personnel, Males, Rehabilitation Centers, Statistical Data, Statistical Surveys, Tables (Data)

A nationwide statistical survey of training schools, forestry camps, ranches, and diagnostic and reception centers for long-range treatment of delinquent children was conducted in 1966. Of the 304 known institutions in the United States, 292 returned reports. Approximately 51,000 children (79% boys) were living in the facilities, an increase of 16% over 1964 and a rate of 195 per 100,000 of the total child population in the country (aged 10 to 17). Further findings were as follows: in over 50% of the institutions, children stayed 8 months or less; 80% of the institutions were operating under state, and 20% under city and county auspices; 38% had a capacity for over 150 children, the maximum capacity recommended by the Children's Bureau; and four out of 10 were overcrowded. There were 2.2 children for every full time employee (administrative, treatment, educational, operational, and maintenance). Average per capita operating expenditure was $3,345 and a total of $184 million spent by all institutions, a 37% increase over the 2-year period from 1964 to 1966. Findings are summarized nationally and by geographic divisions in the 19 tables. (SN)

STATISTICS on PUBLIC INSTITUTIONS for DELINQUENT CHILDREN 1966

THE STUDY

This report on public institutions for delinquent children is based on current annual data collected through a uniform and nationwide survey. Data were obtained concerning the children, the institutions, expenditures, and personnel. The survey covered the fiscal year July 1965-June 1966 for all but 48 of the institutions reporting in the survey; for the 48, the period is either the calendar year 1965 or some fiscal period used by the institution itself which overlaps with fiscal year 1965-66.

For the purpose of this report, a public training school is defined as a specialized children's institution operating under public auspices and serving delinquent children committed to it by juvenile courts. It is, furthermore, a facility used primarily to provide long-range treatment. This definition includes forestry camps and diagnostic and reception centers. Detention homes, which provide short-term care for children pending court decisions, are not included, nor are institutions or camps used primarily for young adult offenders.

This survey was conducted among the total known public institutions (304) in the United States, including the District of Columbia, the Virgin Islands and Puerto Rico. This figure includes 206 training schools for juvenile delinquents (one Federal institution), 87 forestry camps and ranches, and 11 reception and diagnostic centers.

Of the 304 institutions, 95 percent (292) returned reports covering the information requested. Most were under State rather than local auspices, and most served boys only. The data therefore strongly reflect these two factors.

The data as summarized nationally and by geographic divisions tend to conceal wide variations among individual institutions. Statistics for the individual institutions, as well as other detailed data, are presented in the appendix tables. Wide differences between the statistics for one institution compared with those of another may be due to any of a variety of factors: size and geographical setting of the institution, its leadership, the scope and content of its treatment program, the quality and quantity of its personnel, its

policies and range of choice in selecting children for admission, and the outside pressures to which it is subjected. Despite the complexity of the situation underlying the figures, however, individual institutions can interpret them to compare its own program with others and account for its variations.

The last report in this series was for fiscal year 1964. The Children's Bureau did not request a report from the institutions for fiscal year 1965 since improved methods for national reporting were then being devised. The revised methodology will allow more valid regional comparisons for similar types of institutions.

FINDINGS

The Children

Approximately 51,000 children were living in public institutions for delinquent children on June 30, 1966, an increase of 16 percent over 1964. The increase was due largely to the opening of new training schools, forestry camps, and reception centers and reporting by several small institutions for the first time. The rate was 195 children per 100,000 of the total child population (aged 10 through 17), an increase from 172 per 100,000 in 1964.

This rate varies from 121 to 341 in different parts of the country (see table 1). The variation does not prove wide geographical differences in delinquency, for to a considerable extent the rates reflect differences among the States in their community resources and services for children. Many local courts have no well-developed probation services or public or voluntary agencies available to which they can refer children for help. In many such instances, a court can only refer them to public training schools since they are the only available resource. In some States, children are committed to voluntary institutions, with their care paid for out of public funds. Also, the number of delinquent children that institutions can take care of, is limited by their capacity.

Table 1.--Rate of children in institutions, per 100,000 child population by geographic division, 1966.

Geographic division[a]	Rate per 100,000 child population (10 through 17 years of age)
All divisions	195
New England	160
Middle Atlantic	121
South Atlantic	238
East South Central	188
East North Central	166
West North Central	183
West South Central	192
Mountain	205
Pacific	341

[a]For States located in each division, see appendix table K.

Boys made up over three-fourths (79 percent) of the children served by public training schools. This proportion has not changed since 1953. The proportion of boys in the various geographic divisions ranged from 69 to 86 percent. They made up eighty-seven percent of the children in local training schools and 100 percent of the youths in forestry camps.

length of stay

Over 50 percent of the institutions kept their children 8 months or less while only 20 percent kept their children for a year or more. Girls on the average stay in institutions around 2 months longer (10.6 months) than boys (8.7 months). As shown in table 2, the average length of stay in forestry camps and reception and diagnostic centers was shorter than in State, city or county training schools.

Table 2.--Average length of stay by type of institution, 1966

Type of institution	Average length of stay (months)
All institutions	8.7
State training schools	9.3
City and County training schools	10.1
Forestry camps	6.9
Reception and diagnostic centers	2.5

Although most children in training schools and forestry camps are sent there for an indeterminate period, the length of time a child does stay is often influenced by criteria other than the child's readiness for release, e.g., his having reached the maximum age served, a decision that nothing more can be done for him, or population pressures.[1]

The Institutions

Of the 292 institutions reporting, 80 percent were operated under State auspices, and 20 percent under city and county auspices. Sixty-eight percent served boys only, 23 percent served girls only, and 9 percent served both.

Thirty-eight percent of the institutions had a capacity of 150 or more children. However, the proportion of institutions with capacities under 150 was greater in 1966 (62 percent) than in 1964 (58 percent). The Children's Bureau has recommended that 150 children be the maximum capacity for a training school.[2] Administrators of training schools have found that small institutions provide a more conducive atmosphere for treatment and training. Almost 4 out of 10 institutions were housing more children than their stated capacity: 114 institutions (39 percent) had an occupancy of over 100 percent. Another 72 institutions (25 percent) had an occupancy of 90-100 percent. (see table 3)

[1] Institutions Serving Delinquent Children--Guides and Goals, Children's Bureau Publication No. 360, Government Printing Office, Washington, D.C., 20402, 1962, p. 134.

[2] Institutions Serving Delinquent Children, p.33 (see footnote number 1).

Table 3.--Percent of institutions having an occupancy rate of more than 100 percent, by type of institution, 1956-1966.[a]

Type of institution	Percent overcrowded					
	1956	1958	1962	1963	1964	1966
All institutions	27.8	40.5	44.7	44.7	47.5	39.0
State training schools	32.3	45.5	47.0	44.0	50.0	44.3
City and County training schools	0.0	7.7	20.0	12.5	0.0	37.9
Forestry camps	21.4	21.4	46.2	59.0	45.5	23.0

[a] Occupancy rate was computed by dividing the number of resident children on the last day of the reporting period by the capacity of the institution.

Expenditures

An estimated total of $184,000,000 was spent by public institutions serving delinquent children for operating costs and capital outlay--a 37 percent increase over the 2-year period 1964-1966. The increase reflects expenditures for new institutions, for institutions not previously reporting, and for a general increase in operating costs. For institutions reporting in both years total operating costs increased about 22 percent. (see table 4)

Table 4.--Percent change in operating expenditures by type of institution, 1964-1966.

Type of institution	Percent change in operating expenditures, 1964-66[a]		
	Total	Salaries and wages	Other
All institutions	+22	+24	+18
State training schools	+21	+23	+16
City and County training schools	+15	+4	+36
Forestry camps	+35	+42	+19

[a] For those institutions reporting both years

Of total money spent, 89 percent went for current operations such as the costs for salaries and wages, food and clothing, office and household supplies, and minor building repairs; the remaining 11 percent was spent for capital improvements. Geographic divisions showed a range in expenditures for salaries and wages from 63 percent of the money for current operations in the West South Central division to 82 percent in the East North Central division. (see table 5)

Table 5.--Percent of operating expenditures used for salaries and wages, by geographic division, 1966.

Geographic divisions	Salaries and wages	Percent of all operating expenditures
All divisions	$122,482,614	75
New England	7,495,878	78
Middle Atlantic	18,348,186	78
South Atlantic	14,290,630	69
East South Central	7,075,327	63
East North Central	22,762,777	82
West North Central	7,800,579	74
West South Central	7,375,688	64
Mountain	3,449,612	73
Pacific	33,885,937	75

The extent to which a geographic division's economic resources are used to finance public institutions for delinquent children can be expressed by how much a division spends for these institutions for every $10,000 of personal income. These figures for the nine divisions are shown in table 6.

Table 6.--Estimated total operating expenditures for public institutions for delinquent children, personal income, and expenditures per $10,000 of personal income, by geographic division, 1966.

Geographic divisions	Total operating expenditures	Personal income[a]	Expenditure per $10,000 income
All divisions[b]	$163,437,151	$532,147	$3.07
New England	9,570,023	33,383	2.87
Middle Atlantic	23,550,912	114,822	2.05
South Atlantic	19,619,341	44,507	4.41
East South Central	11,281,939	46,348	2.43
East North Central	27,822,074	114,109	2.44
West South Central	11,041,009	43,528	2.54
West North Central	10,595,118	41,609	2.55
Mountain	4,757,131	11,841	4.02
Pacific	45,199,604	82,000	5.51

[a] Personal income is the current income from all sources received by the residents of each State, and is widely accepted as an index of relative economic capacities of the States which make up each division.

[b] Excluding Puerto Rico and Virgin Islands

[c] Source: Survey of Current Business, U.S. Department of Commerce, August, 1966, Table 1, p. 12.

per capita operating expenditures

In this study, annual per capita operating expenditures were computed by dividing the total operating expenditures of an institution by its average daily population.. Only those expenditures paid for by the institutions out of their allotted budget were included in the calculations.

The average annual per capita operating expenditure was $3,345, but institutions and geographic divisions showed considerable variation. The highest expenditures were reported in the New England, Middle Atlantic, and Pacific divisions, while the East South Central and West South Central divisions reported the lowest averages. (see table 7)

Table 7.--Per capita operating expenditures, by geographic division, 1966.

Geographic division	Per capita operating expenditures
All divisions	$3,345
New England	4,111
Middle Atlantic	4,824
South Atlantic	2,682
East South Central	1,929
East North Central	3,669
West North Central	2,595
West South Central	2,045
Mountain	3,607
Pacific	4,476

Personnel

Public institutions for delinquent children have as their main goals training, re-education, and rehabilitation.[3] With these goals in mind, too much emphasis cannot be placed upon having well-qualified personnel to work with these children. Unfortunately, data indicates that institutions are experiencing considerable difficulty in recruiting and retaining sufficient numbers of well-qualified people.[4]

In 1966 there were an estimated 22,500 full-time employees, an increase of about 21 percent over 1964. Most (66 percent) were in the treatment and education categories (see table 8). A percentage decrease of personnel was found in the operational and maintenance categories. There were 977 part-time employees.

---

3 Institutions Serving Delinquent Children, p. 3 (see footnote 1).

4 See Personnel and Personnel Practices in Public Institutions for Delinquent Children; a Survey, 1966, for an extensive discussion of staff turnover.

Table 8.--Percent distribution of employees, by type of employee, and by type of institution and auspices, June 30, 1966.

Type of institution by auspices	Percent distribution of employees		
	Administrative	Treatment and educational	Operational and maintenance
All institutions	10.8	65.5	23.7
State auspices			
Training schools	10.4	65.6	24.0
Forestry camps	15.7	68.5	15.8
Reception and diagnostic centers	9.8	75.0	15.2
City and County auspices			
Training schools	11.0	52.3	36.7
Forestry camps	17.3	65.0	17.7

However, in this reporting period, as in 1964, the East South Central division had a larger proportion of its employees in operation and maintenance than in treatment and education.

The number of job vacancies increased 386 from 1964 to 1966. The highest percentage of vacancies occurred in the East North Central division; the lowest in the Mountain division.

ratio of children to staff

In 1966, there were 2.2 children for every full-time employee (administrative, treatment, educational, operational, and maintenance). This was the same as in 1964. The ratio is based on the filled positions on the institution payrolls; if all the vacancies were filled, then the child-employee ratio would drop to 2.1. One hundred and twenty-nine institutions reported no vacancies on their staff. Of these about one-fourth had a child-employee ratio as high as 3.1 or more, and there seemed to be little prospect of lowering the ratios.

APPENDIX TABLES

Data in the following tables are limited to the 292 public institutions for delinquent children that reported for the fiscal year 1966.

LIST OF TABLES

Table	Title
A	Basic data from public institutions for delinquent children, by State, 1966.
B	Number of public institutions for delinquent children, by division, auspices and type of institution, 1966.
C	Number of children in public institutions for delinquent children, by division, auspices and type of institution, 1966.
D	Average length of stay in public institutions for delinquent children, by division, and type of institution, 1966.
E	Capacity of public institutions for delinquent children, by division and type of institution, 1966.
F	Occupancy of public institutions for delinquent children, by division and type of institution, 1966.
G	Annual expenditures and per capita operating expenditure of public institutions for delinquent children, by division and type of institution, 1966.
H	Number of full and part time personnel and number of vacancies in public institutions for delinquent children, by division and type of institution, 1966.
I	Number of full-time personnel in public institutions for delinquent children, by classification of employees and number of vacancies, by division, auspices and type of institution, 1966.
J	Ratio of children to employees in public institutions for delinquent children, by division, 1966.
K	Divisional classification of States, 1966.

[a] Data as of last day of reporting period.
[b] Percent vacancies was computed by dividing the number vacancies by the sum of the number of employees plus the number of vacanies.

2

Table J.--RATIO OF CHILDREN TO EMPLOYEES IN PUBLIC INSTITUTIONS FOR DELINQUENT CHILDREN, BY DIVISION, 1966

Geographic divisions	Total	Child-employee ratio[a]		
		Administrative employees	Treatment and educational employees	Operational and Maintenance employees
All divisions	2.2	20.2	3.3	9.2
New England Division	1.7	17.4	2.8	5.7
Middle Atlantic Division	1.5	10.9	2.3	6.5
South Atlantic Division	2.6	26.4	4.0	10.6
East South Central Division	3.3	27.6	6.7	8.3
East North Central Division	1.8	16.2	2.5	9.8
West South Central Division	2.3	27.2	4.0	11.8
West North Central Division	2.7	30.7	4.0	11.5
Mountain Division	2.1	18.1	3.1	9.7
Pacific Division	2.2	21.0	3.3	10.0

[a] The child-employee ratio was computed by dividing the average daily child population in the institution by total of full-time employees.
